

Sir,

It is always an enjoyable experience attending your class. I really used to look forward to be in your class. You have really developed an interest in the subject and its day-to-day applications deeply.

The atmosphere you build in the class is at the same time both interesting and relaxing. And the way you coax us to think out the ~~answers~~ answers by ourselves is really helping us to do things on our own. If only you could demonstrate some experiments, the class will be more efficient.

I will really be missing your classes in the forthcoming semester.

Thank you  
for the  
class

### POSITIVES:

- Really Interactive classes.
- Very informative.
- Good presentation and better understanding of topic.
- able to get a clear idea about real life applications.

### NEGATIVES:

- Really brief explanations. It would be better if explanations are made in a way that covers vast area of topics.

Sir,

Your classes are really excellent and of top class approach. Never had such a wonderful experience in the classroom.

Respected sir,

your way of teaching is too good and also it contain some gave some information regarding the subject which happend in our day to day life, which are are not noticing. if you ~~are~~ gave ~~so~~ notes regarding the topics, your class will be more effective for us.

### Negative

- You are just giving only some points related to a single topic. Just like giving clues
- speed teaching

### Positive

- You showed me the importance of chemistry in daily life
- Every day I'll wait for your discussion about application of chemistry in daily life
